

South Staffordshire Water

Statement of Assurance

As South Staffordshire Water's Business Lead Security and Resilience, I can confirm that I have been asked to review the South Staffs Water Draft Drought Plan (March 2026) and the Cambridge Water Draft Drought Plan (March 2026). I can confirm that neither document contains information that could pose a risk to national security interests. Any plans showing the location of abstractions will be redacted from the publicly published version.

A handwritten signature in black ink, appearing to read 'M. Morris'.

Michael Morris
